

Financial Assistance Programs

How to find the right one for you

The Stentplus™ Patient Success Program provides access to information about a broad range of financial assistance programs for medication assistance. Through such programs, paying for your doctor-prescribed medications may be easier or may be at no cost to you.

There are three main types of programs that you may qualify for:

Private Programs

Sponsored by drug companies, these need-based programs provide prescriptions to patients at low or no cost.

- For those who qualify, enrollment is free
- Low or no cost for prescription medications
- Examples include the Bristol-Myers Squibb Assistance Foundation and Rx Outreach

Government Assistance Programs

Government programs typically offer patients prescription medications at a greatly reduced rate.

- Available to patients who meet program criteria
- Cost of enrollment varies
- Examples include Medicare, Veterans Administration, and state-specific programs

Discount Cards

Prescription-savings cards offer prescription discounts to a broad range of patients.

- Enrollment is quick, easy, and usually free
- Discounts can be up to 75%
- Examples include the PS Card, Together Rx Access, and eSUN Card

To help you find which program will best fit your needs, contact the Partnership for Prescription Assistance (PPA). PPA provides you with access to almost 500 public and private patient assistance programs. Visit their Web site at www.pparx.org or make a toll-free call to **1-888-4PPA-NOW (1-888-477-2669)**.

For more information about medication financial assistance or other parts of the Stentplus™ Program, go to www.stentplus.com.

We'll help you get what you need, because we want you to succeed.
